DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 3/25/2004, 4/5/2004, 5/9/2005 and 5/23/2005 are acknowledged. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner considers the references cited therein.

Election/Restrictions

2. Claims 11-12, 16, 29-30 and 32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/14/2006.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-2, 4-5, 7-10, 13-15, 17-18, 20, 24-26, 28, 31, 33-34 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Meier *et al.* ('106).

5. Meier *et al.* discloses a catheter comprising a first lumen (40), a venting lumen (52), an inflation lumen (51), a venting mechanism (50), and a balloon member (23). (See Figure 9)

6. It appears that Meier *et al.* reasonably discloses every element of claims 1-2, 4-5, 7-10, 13-15, 17-18, 20, 24-26, 28, 31, 33-34 and 36.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 9. Claims 3, 6, 21-23, 27 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meier *et al.* ('106) in view of Booth *et al.* ('665).

Application/Control Number: 10/729,408 Page 4

Art Unit: 3763

10. Meier *et al.* discloses a catheter comprising a first lumen (40), a venting lumen (52), an inflation lumen (51), a venting mechanism (50), and a balloon member (23). (See Figure 9)

- 11. Meier *et al* fails to disclose a venting mechanism comprising a gas permeable liquid impermeable porous material.
- 12. Booth *et al.* teaches a cannula with gas venting capabilities. Booth *et al.* teaches using a porous hydrophobic membrane composed of polytetrafluoroethylene. (See Column 11 Lines 35-50)
- 13. It would have been obvious at the time of the invention to one of ordinary skill in the art to modify the disclosure of Meier *et al.* with the teachings of Booth *et al.* to provide a venting mechanism comprising a porous material.

Conclusion

- 14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
